

BACKS TO GOLF COURSE

ENERGY STAR

**STAFFORD**  
HOMES & LAND INC

The artist rendering is a preliminary illustration. Actual finish and trim WILL vary, shown for reference only.

**BAKER CREEK**

## 2016 NW Victoria Dr \$564,900

3 Bed, 2 Bath, 2144 sf, 3-car garage, Tray ceiling accents

**Contemporary charm in single-level home** offers an open floor plan. Backs to the golf course greens! Rich slab quartz counters in kitchen with full back splashes and island. Covered front entry & back patio. Smart flooring choices in laminate wood, green-label certified carpet and vinyl w-fine details. Tray ceilings in great room and master. Stainless finish appliances, cozy gas fire place. Fully landscaped with timer controlled sprinkler, fenced and gated back yard. **Energy Star®** certified.

**Features include:** EPS energy efficiency scoring, Coated garage floor, Glass shower enclosure in master, Gas fire place, 96% High-efficiency furnace, Quartz slab counter, Landscaped, Sprinkler system with timer. Solar-ready panel.

3 Bed, 2 Bath, 2144 sf, 3-car Garage Lot 10 / Property Type: Detached / ML#18581615 / Memorial Elem / Patton Mid / McMinnville High / BI-MICO / DW / DISP / GAS-RNG / SSAPPL / 96+ GAS-FOR-AIR / GAS-FPLC / LAM-FL / VINYLFL / WW-CARP / COV-ENTRY 2016 NW Victoria Drive, McMinnville, OR 97128

EPS™ IS AN ENERGY PERFORMANCE SCORE that measures and rates the net energy consumptions and carbon footprint of a newly constructed home. The lower the score, the better — a low EPS identifies a home as energy efficient with a smaller carbon footprint and lower energy costs.

**THIS HOME:** Estimated average energy cost per month: Electric \$56, Natural Gas \$18 (Estimated Energy Cost calculated using \$0.11 per kWh and \$0.91 per therm)

**ENERGY-EFFICIENT FEATURES** that contribute to this home's score:

- Insulated Ceiling: R-60 Efficient Windows: U-0.3 Space Heating: 96.0 % AFUE Furnace
- Insulated Walls: R-23 Efficient Lighting: Envelope Tightness: 3.0 ACH @ 50Pa
- Insulated Floors: R-30 Water Heater: Heat Pump 3.2 EF

Specifications, pricing, finish and designs subject to change without notice. Features, trim, details and elevations will vary from artist rendering and marketing plan. Materials subject to market fluctuations, supplier availability and product cycles; which may require substitution of equal to or better than items solely at the discretion of the builder. REV. 3/15/2019

EPS is a tool to assess a home's energy cost and carbon footprint.

EPS™ is an energy performance score that measures and rates the net energy consumptions and carbon footprint of a newly constructed home. The lower the score, the better — a low EPS identifies a home as energy efficient with a smaller carbon footprint and lower energy costs.

**Estimated Monthly Energy Costs**

**\$74\***

Estimated average annual energy costs:

**\$889\***

**Estimated average energy cost per month:** Electric \$56, Natural Gas \$18

Estimated Energy Cost calculated using \$0.11 per kWh and \$0.84 per therm

**Location**

2016 NW Victoria Ct McMinnville, OR 97128

**YEAR BUILT:** 2019

**SQ. FOOTAGE:** 2,144

**EPS ISSUE DATE:** None

**RATED BY:** Moffet Energy Modeling

**CCB #:** None

**Utilities:**

Gas: NW Natural Gas

Electric: Portland General Electric

**Energy Score**

**48**

**ENERGY SCALE:** Based on home energy use of natural gas, electricity, or energy generated from an installed renewable system.

**Estimated total annual gross energy usage:** Electric (kWh): 6,073, Natural Gas (therms): 256

**Estimated average annual energy generation:** No system

**Estimated average net energy usage:** Electric (kWh): 6,073\*, Natural Gas (therms): 256

**CARBON FOOTPRINT:**

Measured in tons of carbon dioxide per year (tons/yr). One ton ≈ 2,000 miles driven by one car (typical 21 mpg car).

**Estimated average carbon footprint:** Electric (tons/yr): 2.8, Natural gas (tons/yr): 1.5

\*Actual energy costs may vary and are affected by many factors such as occupant behavior, weather, utility rates and potential for renewable energy generation. A home's EPS takes into account the energy-efficient features installed in the home on the date the EPS was issued, but does not account for occupant behavior.

**PRELIMINARY**

EPS is a tool to assess a home's energy cost and carbon footprint.

## + Energy-efficient features that contribute to this home's score:

**Insulated Ceiling: R-60**    **Efficient Windows: U-0.27**    **Space Heating: 96.0 AFUE Furnace**  
**Insulated Walls: R-23**    **Efficient Lighting: 100.0 %**    **Envelope Tightness: 2.5 ACH @ 50 Pascals**  
**Insulated Floors: R-30**    **Water Heater: 3.4 EF**

### What was considered in developing this score?

A home's EPS is based on the energy-efficient features listed above as well as the home's size and specific design. Improvements and updates made to the home after the issue date will impact its EPS. EPS does not factor in occupant behavior, and as a result, actual energy costs may vary.

USEFUL TERMINOLOGY

#### Energy-efficient features

**R-Value:** Rates the efficiency of insulation; a higher R-Value signals improved performance of floor, ceiling and wall insulation.

**U-Value:** Indicates the rate of heat loss in windows; a lower U-Value demonstrates the effectiveness of a window, resulting in a more comfortable home.

**ACH @ 50Pa:** Total air changes per hour at 50 pascals; a low number signifies a properly-sealed home with fewer air leaks.

**EF:** Energy Factor for water heaters or appliances; the higher the EF, the more energy efficient the model.

#### Energy Score

A home's EPS is shown on an energy scale that ranges from zero to 200+ and is based on home energy use of natural gas, electricity, or energy generated from an installed renewable system.

#### Carbon footprint:

A home's energy consumption affects carbon emissions and impacts the environment. The carbon calculation for EPS is based on emissions from the utility-specific electricity generation method and natural gas consumption of the home at the time of this report.

#### Similar size Oregon home

**Energy:** The energy consumption of an average Oregon home of similar square footage, heating type and geographical region.

**Carbon:** The carbon footprint of an average Oregon home of similar square footage, heating type, geographical region and utility mix.

**This home if built to code:** The estimated annual energy and carbon use for this home if it was just built to the minimum standards allowed under Oregon code at the time of construction without energy-efficient features installed.

### Brought to you by Energy Trust of Oregon

Energy Trust developed EPS to educate about energy efficiency and provide a tool to help inform home-buying decisions.
